- English: Advanced (B2-C1)

OBJECTIVE

I am Mohamed Iliass Kaddar, 20 years old, originally from Errachidia. As a passionate first-year student in Software and Intelligent Systems (LSI), I am seeking an internship at Oracle Morocco R&D Center. I aim to leverage my skills in programming languages and database management to contribute to Oracle's innovative projects while enhancing my expertise in advanced software solutions.

ACADEMIC PROJECTS

Marketplace Recruitment Platform - Woorx 2030 - PRESENT
Database Management Final Project

- Designed and implemented a database for an online recruitment platform to connect companies and talents.
- Features include role-based access control (normal user, candidate, recruiter, admin), scheduling interviews, and managing job offers.
- Utilized triggers and stored procedures to automate processes.

Bank Management System 2025 - 2029
C++ Project with Qt

- Collaborated with a team of three to create a banking management system with GUI.
- Features include deposit and withdrawal, account-to-account transfers, and account information display.

Project and Task Management
php Project

- Development of a web application to manage projects, tasks, users, and comments. The application includes features such as user account creation, project and task management, report generation, search, and notification management.
